This is a single tool that combines some of the best detection and removal features available for free online. Malwarebytes is one of the leading anti-malware apps on the market, and it comes highly recommended. It's easy to use and gives fast scans. Malwarebytes 3.5.1.2522 Premium provides a complete security package for your PC, checking for viruses, malware, adware, spyware, trojans and more. Malwarebytes works to remove all detected threats, but it also offers to help you keep your PC safe against new threats as they are identified. Malwarebytes uses the latest scanning methods, which not only scans for malware but also seeks out suspicious files and processes. It also uses a proprietary file signature database to make sure that it spots and blocks the newest and most dangerous threats. This version of Malwarebytes is the premium edition, and it offers better premium protection than the free edition. This means that it will keep your computer cleaner for longer, and it will also give you better protection against malware, spyware and viruses. If you are looking for an easy-to-use app that will take away your worries about online threats and malware, then Malwarebytes should be your first stop. It's available for Windows, Mac and Android. What's New -- Automatic Cleaning With Malwarebytes 3.5.1.2522 Premium, you can automatically clean your PC on a schedule. This works by scanning your system every hour.
